

Improve decision-making with faster, more accurate budgets and forecasts

Solution Overview

By leveraging the data already in your MRI Core Accounting system, this highly efficient module enables your budget teams to quickly produce dynamic budgets and forecasts to support your business goals. Featuring a flexible, intuitive interface – Users can collaborate easily while configurable analytics and reports, generated from lease-level detail, provide actionable insights.

Key Features

-  Automated investment structure set up and consolidation
-  Produce precise business projections with configurable leasing assumptions
-  Easily access your current and historical financial data
-  Save time with single-click creation and posting
-  Easily identify variance, make strategic adjustments and re-forecast
-  Determine budget access with user-defined security and client-defined workbooks and teams
-  Navigate with spreadsheet-like views, keyboard shortcuts, and graphical views

Business Benefits

- Produce accurate budgets and forecasts using detailed property and financial data in your MRI Property Management X
- Provide greater visibility into financial performance with tailored analytics and configurable budget reports
- Increase efficiency and improve collaboration with a single, centralized budgeting tool
- Eliminate the challenges of manual data entry, version control, and time-consuming import/export
